

UI Prototypes Report – Group 03

I. As an Admin:

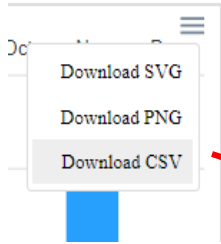

1. Dashboard screen:

- When connect to the website, an admin has a different homepage comparing to the Visitor Homepage, to be more clear:

Picture 1. Screen of dashboard of an Admin

- As this homepage screen, we can see something easily what we explain bellow:

We can also download the revenue dataset for further analyse

This is a simple table that can show the admin the information of recent order such as: Product name, customer's email, customer's address and date ordering, so that admin can control the number of product more easily.

The 4 main things that help Admin to manage the shop effectively

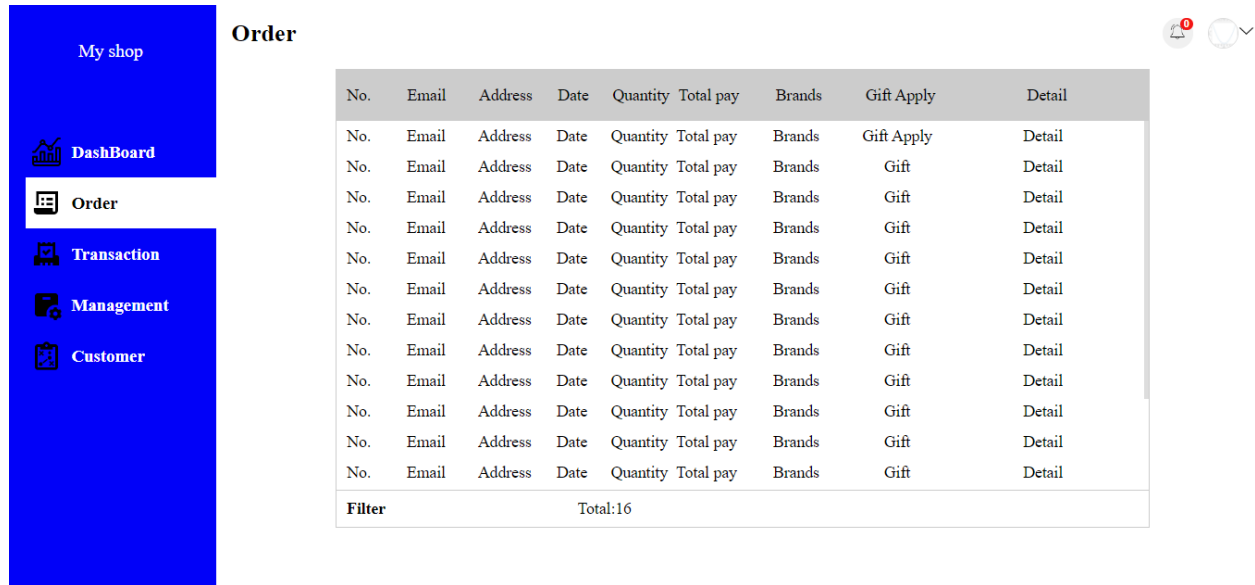

It helps admin show the sum of solded products in 12 months of 2022 and the 3 years before

This table gives information of new customers for admin in order to analyse the distribution of the new and old customer

Picture 2. Some explanations of Dashboard for an Admin

Picture 3. Screen of Order for an Admin

Description: This screen shows Admin the detail in every order of every customer:

- First column is the order of customer from 1 to n ($n > 1$).
- Second column is the email's customer in order to help Admin announce something immediately or importantly to the customer.
- Third column is the date of order, it is like a evidence of a trading.
- The fourth column is the number of products ordering in order to help Admin control the product flow properly.
- The fifth column is the amount of money that customer have to pay (after discount if have) which can help Admin to manage the revenue clearly.
- The sixth column is the brand of products such as: Adidas, Nike,...
- The seventh column is about the Gift apply that shows the name of voucher that customer used.
- The last column show the detail of product: size, colour, brand,...

Note: List on this **Order** screen is only for customers who order and do not receive the products, if they had receive products, data of them will move to **Customer** screen.

3. Transaction Screen:

Id	Email	Date	Quantity	Total pay	Brands	Gift	Detail
Id	Email	Date	Quantity	Total pay	Brands	Gift	Detail
Id	Email	Date	Quantity	Total pay	Brands	Gift	Detail
Id	Email	Date	Quantity	Total pay	Brands	Gift	Detail

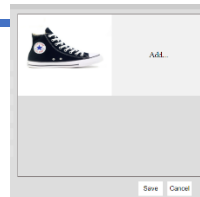

Filter Total:3

Description: It is easy to identify all of the column meaning, specially it has an ID column which is always different for different customer.

Picture 4. Screen of transaction for Admin

4. Management screen:

Add Product is used for Admin to add new products and update product information such as: Name, code, price, size, brand, colours and add picture

Manage Table helps admin shows the update of products clearly and easy to control
